Category Policy Addendum: Electronics

KARTWAY CUSTOMER OPERATIONS POLICY HANDBOOK
Document Ref: COP-ADD-CAT-ELEC-04
Category: Consumer Electronics & Computing Hardware
Policy Owner: Malini Sen, Lead Specialist, Returns & Escalations
Effective Date: 01 November 2024

1.0 Return Window * 1.1 Standard Eligibility Window: Customers must initiate all standard return requests for items under the Electronics category within exactly 15 days from delivery. * 1.2 Expiration: The return interface locks at 23:59:59 on the 15th calendar day following documented carrier delivery. Support agents are barred from overriding this cutoff for change-of-mind claims.

2.0 Condition Requirements & Packaging Integrity * 2.1 Original Packaging Mandate: Original packaging is mandatory for every return in this category. The outer manufacturer box, serialized barcodes, internal trays, inserts, protective films, user manuals, and bundled hardware accessories must be present. * 2.2 Data Erasure: Personal user data, factory-locked credentials (including BIOS passwords, biometric locks, cloud account linkages, and personal PINs) must be cleared prior to handover. An agent may not authorize a return if a device remains remotely or physically locked to a user profile.

3.0 Change-of-Mind Returns and Associated Deductions * 3.1 Opened Package Restocking Fee: If a change-of-mind return involves an item whose manufacturer packaging seal has been broken or packaging has been unsealed, Kartway applies a restocking fee of 15% of the amount paid. This sum is automatically calculated by the billing system and deducted from the gross credit. * 3.2 Unopened Returns: Items returned in an unopened, factory-sealed state for change of mind incur no restocking fee. * 3.3 Return Pickup Fee: Every change-of-mind return incurs a return pickup fee of 99 rupees, which is deducted directly from the refund total prior to disbursement. * 3.4 Fee Calculation Sequence: For an unsealed change-of-mind unit: $$\text{Net Refund} = \text{Amount Paid} - (\text{Amount Paid} \times 0.15) - 99 \text{ rupees}$$

4.0 Damaged, Defective, or Incorrect Deliveries * 4.1 Notification Window: A customer who receives an item that is damaged in transit, physically defective on arrival, or incorrect (mismatched SKU or specification) must report the issue within 15 days of delivery. * 4.2 Refund Settlement: Validated claims under Clause 4.1 are refunded in full with no fee. * 4.3 Fee Exemptions: Neither the 15% restocking fee nor the 99 rupees pickup fee applies to shipments covered under this section. Reverse shipping charges are absorbed fully by Kartway.

5.0 Hazardous Materials & Battery Logistics * 5.1 Lithium Battery Reverse Logistics: Any item containing or packaged with lithium-ion or lithium-metal cells must be routed through certified surface logistics channels. Agents must set the carrier routing protocol to surface transport only; air haulage is prohibited under carrier hazmat rules. * 5.2 Thermal and Physical Battery Hazards: A battery that is visibly swollen, bulging, emitting smoke, or exhibiting extreme overheating is classified as a hazardous incident. * 5.3 Hazard Protocol Override: Any occurrence defined in Clause 5.2 must be processed as a product-safety report, never a routine return. * 5.3.1 Exclusion from Return Transport: Physical reverse pickup of the defective battery is strictly prohibited to prevent transit fires. * 5.3.2 Escalation Assignment: The agent must log an emergency ticket to the Kartway Safety Incident Desk (Queue: `SEC-BAT-ALERT`) and instruct the customer on local hazardous waste disposal.

6.0 Warranty Coverage * 6.1 Warranty Assignment: Items within this category do not carry a unified blanket coverage duration. Instead, products carry the warranty period shown on their own listing. * 6.2 Permitted Warranty Terms: The catalog accepts only four definitive warranty terms: none, 6 months, 12 months, or 24 months. * 6.3 Warranty Inception: The warranty window begins on the delivery date confirmed by the carrier, not on the original order placement or dispatch date. Claim verification relies solely on the recorded delivery timestamp.
